Work History

2019-09 -

Current

Principal Full Stack Software Developer

ZooWho Inc, Provo, UT

- Principal full-stack software developer building and making product-level decisions on JavaScript web and mobile applications (React/React Native) and a RESTful API written in PHP (Laravel).
- Designed, administered, supported and monitored MySQL databases by proactively resolving database issues and maintaining servers provisioned on Amazon Web Services (AWS).
- Collaborated on all stages of software development lifecycle, from requirement gathering to production releases.

2019-01 -

2019-09

Front End Web Developer

Utah Valley University, Orem, UT

- Led web projects from conception to deployment and maintained dozens of websites spanning 13 academic departments.
- Wrote clean HTML, CSS, JS, and PHP code, integrating design, extensions and third-party apps according to web development plans.
- Assembled and addressed technical and design requirements, integrating user-facing and front-end elements to maintain web presence effectiveness.
- Tested site compatibility across multiple browsers and devices, uncovering and debugging issues
